Aligarh, UP , India

## OBJECTIVE

Seeking a challenging position in your organization to leverage my expertise in machine learning, utilizing cutting-edge technologies and frameworks. Aiming to contribute to innovative projects that integrate machine learning with practical problem-solving in fields such as software engineering and data-driven applications.

## EDUCATION

<b>Institute of Engineering and Technology, Lucknow</b>	Sept 2023 – May 2025
• Master of Computer Application	
• <b>CGPA:</b> 8.76	
<b>Aligarh Muslim University, Aligarh</b>	Sept 2019 – May 2022
• Bachelor of Computer Science	
• <b>Percentage:</b> 63.2	

## INTERNSHIP

<b>Canvas Chrome Designs, Lucknow</b>	Nov 2024 – Jan 2025
• Python Developer	
• Implemented automated data scraping using BeautifulSoup and Scrapy, significantly improving data collection efficiency and accuracy.	
• Developed and integrated RESTful APIs with Flask, ensuring seamless communication between frontend and backend systems while optimizing performance.	

## Projects

<b>SMS Spam Classifier</b>	GITHUB
• Detect and categorize SMS messages as spam or ham, improving message filtering for users.	
• Used Python, scikit-learn, NLP for model development, and MySQL for data storage.	
<b>Laptop Price Prediction</b>	GITHUB
• Estimate laptop prices based on features like brand, specs, and condition.	
• Utilized Python, scikit-learn, and pandas for model training, with Flask for deployment.	
<b>Movie Recommendation System</b>	GITHUB
• Suggests movies based on user preferences and ratings using collaborative filtering.	
• Implemented with Python, pandas, and scikit-learn, leveraging Matrix Factorization and deployed via Flask.	

## SKILLS

**Languages:** C, C++, JavaScript and Python.

**Libraries:** Numpy, Pandas, Streamlit, Pickle, Seaborn, Matplotlib and Scikit-learn.

**Web Development:** HTML, CSS, Javascript, React, Flask and Python.

**Data Engineering:** SQL and Mongoddb.
